STATE ROAD IMPROVEMENT.

Radical Changes

New York Legislature. Radical changes in the methods of construction, supervising and maintaining highways in New York state are recommended in the report recently transmitted to the legislature by the special legislative highway investigating committee appointed by the legistature.

The more important recommendations are:

The creation of a department of highways, to consist of three members appointed by the governor, to have supervision of highways, now in the hands of the state engineer.

The recodification of all existing highway laws into one statute and the repeal of all existing laws on this sub-

The establishment of four systems of highway construction, representing two now unknown in this state continuing in force the present Highle-Armstrong and Fuller-Plank systems

Of the four systems of construction proposed perhaps the most radical is the first, which provides for the con-struction of thirty-five trunk highways. connecting the larger localities of the state and to be built entirely at the expense of the state. At present the state does not undertake the construction of any roads unless the county and towns pay a proportionate share. These thirty-five trunk routes would

The second and third systems are the present Highle-Armstrong and Fuller systems, which have long been in operation. The fourth is what is known as the French system and provides for the construction of purely lecal roads, the expense to be borne by the countles and towns, the state taking no share of the burden.

A bill accompanies the report, but relates only to the highway code. Provision is made for the imposition of a provisional tax on automobiles to de fray the cost of maintenance.

SETTLING DUST NUISANCE.

Treatment Used at an Automobile Factory That Improves Reads.

At an automobile factory in Toledo. O., the manufacturers believe they have settled the dust nuisance and pointed a way to a phase of road improvement. The plant covers a large area. At the rear of the factory buildings is a circular speedway, while be-These roads are subjected to very se vere use from testing cars constantly passing over them, going out and re-turning to the factory, generally at high speed: heavy traffic of large trucks heavily loaded, touring cars and other vehicles. Naturally these drives and the speedway created lots of dust

and required constant repair. Much experimenting has been done and the factory people say they have finally hit upon a good treatment which gives excellent results and is very economical. The factory has its own steel treating furnaces, some oil heated, and it is the sediment from the crude oil used in the beaters, sprinkled with an ordinary can over the surface of the roads that has improved the neighborbood of the plant. Three treatments a eason. It is said, makes the roadbeds waterproof, lays the dust and prevents ruts and breaking of embankments.

President Miller of the Gatva (Ill.) Good Roads association stated recently that over twenty-five miles of road had been graded and as much dragged under the auspices of that organization of road where the grade was complet ed in this manner and draintile land where the water line was within one foot of the surface and through which for many years people waded hub-deep in mud in the spring and sometimes in the fall when it rained. But these portions of the road are now firm and se good as any we have." He also stated that the highway commissioners had been making contracts with the farmers for dragging their roads at \$8 a mile and that the cash system of road working is heartily approved by both the taxpayers and road users.

Hoad Maintenance Scheme.

County Engineer George F Horton of Houston, Tex., has introduced the stitch in time system on the roads under his supervision. Inspectors are employed by the month whose duty it is to patrol the roads at regular intervals and repair all damaged places and care for the ditches and culverts Stations are established along the highways where supplies are stored. It is expected that this method of maintenance will prove far less expensive and keep the roads in better condition than the old way of leaving them until they require almost entire rebuilding.

Gold For Good Road Prizes.

The King drag road meeting held recently at Williamsport, Pa., was all that could be desired. Eight bundred voters wedged into the auditorium at the courthouse to hear D. Ward King of Missouri speak on "Good Ronds Right Now." Deputy State Highway

The Story of a Medicine.

Its name— Golden Medical Discovery*

The suggested by one of its most important and valuable ingredients— Colden

Nearly forty years ago, Dr. Pierce dis-covered that he could, by the use of pure, triple-relined glycerine, aided by a cer-tain degree of constantly maintained heat and with the aid of apparatus and appliances designed for that purpose, ex-tract from our most valuable native me-dicinal roofs that

neat and with the aid of apparatus and appliances designed for that purpose, extract from our most valuable native medicinal roots their curative properties much better than by the use of alcohol, so generally employed. So the now world-famed "Goldon Medical Discovery," for the cure of weak stomach, indigestion, or dyspepsia, torpid liver, or biliousness and kindred derangements was first made, as it ever singe has been, without a particle of alcohol in its marke-up.

A glance table foll list of its ingredients, printed on every bottle-wrapper, will show that it is hade from the most valuable medicinal roots found growing in our American forests. All these ingredients have received the Migney and Colon who recommend them as the very best remedies for the diseases for which Goldon Medical Discovers, a divised. A little book of these endorsements has been compiled by Dr. R. V. Pierce, of Buffalo, N. Y., and will be mailed free to any one asking same by postal card, or letter addressed to the Doctor as alsove. From these endorsements, copied from standard medical books of all the different scincols of practice, it will be found that the ingredients composing the "Golden Medical Discovery" are advised not only for the cure of the above mentioned diseases, but also for the cure of all catarrhai, bronchial and throat affections, accumpanced with catarrhai discharges, hourseness, sore throat, lingering or hang-on-coughs, and all those wasting affections which, if not promptly and properly treated are liable to terminate in consumption. Take Dr. Pierce's Discovery in time and persevere in its mentilly ou give it a fair trial and it is not likely to disappoint. Too much must not be expected of it. It will not cure consumption in its advanced stages. No medicine will, It will cure the affections that lead up to consumption, I maken it me.

A Happy Mother

will see that her baby is properly carer for—to do this a good purgative is necessary Many babies suffer from worms and their mothers don't know it—if your bacy is feverish and doesn't sleep at nights, it is troubled with worms. White's Cream Vermifuge will worms. White's Cream vermitage will clean out these worms in a mild pleasant way. Once tried always used. Give it a trial. Price 25 cents, — at Eddy Drug Company.

Commissioner Ensign spoke in the morning. The audience contained men from all the surrounding counties. some of whom came seventy-five miles The board of trade raised \$1,000 to gold for good road prizes.

Beautifying Road Sides.
The Women's State federation of Delaware has begun the work of planting trees for the purpose of beautifying the road leading from the fork in the New Castle causeway to Faraburst. It is announced that the federation we extend i.s work to other parts of

Plan of Fermers to Build Ros A number of prominent farmers to Charlestown township, in Clark coun ty, have originated a plan for the building of free gravel roads proposed in that township, says a Jeffersonville (Ind.) correspondent of the St. Louis Post-Dispatch. The bids submitted for the work were so high that the farmers decided to have the work done upder their own supervision, thus being assured that it would be done satisfac torily, and save to themselves the profit that ordinarily goes to the contractor. Should this plan work out successfully, as it is believed it will, the residents of other townships in Clark county will adopt it. As far as is known at Jeffersonville, this will be the first time such a pinn was ever tried in Indiana.
